

MK SENTRY CATALOGUE

MK SENTRY RANGE INTRODUCTION

The MK Sentry circuit protection product range has been in production for more than 40 years and through the license agreement its continued supply into the market is guaranteed. The extensive range fully complies with the requirements of the Wiring Regulations, and has the same full guarantees previously received with the offering.

The MK Sentry range of consumer units have been stylishly designed to blend in with its environment. The curved lines and slim line appearance mean it won't look out of place when installed in hallways, lounges or kitchens.

POPULATED UNITS

The pre-populated range of consumer units offers an off the shelf alternative available in 5 different sizes.

MCB

Available as Type B and C curve. Current range 6A-63A with a breaking capacity of 6kA.

RCD

Available as Type A and AC. Current range of 25A-100A and tripping capacity 10mA to 300mA. Breaking capacity 10kA.

AFDD

Available as Type B and C curve with Type A RCD. Current range of 6A-40A with a breaking capacity of 6kA.

RCBO

Available as Type B and C MCB curve, RCD Type A and AC. Current range 6A-50A and tripping current 30mA. Breaking capacity 6kA and 10kA.

SPD (SURGE)

Recommended for all low voltage electrical installations, it prevents the spread of over voltages in the electrical installations and protects the load.

ENCLOSURES

The empty consumer units enable specific configurations to suit required applications with the use of MCB's, RCD, RCBO, AFDD and SPD.

SUPPORTS LATEST BS7671:2018

Full range of products to support compliance with the latest edition of the Wiring Regulations, including full metal non-combustible enclosures for Consumer Units.

GUARANTEE

All products are guaranteed for 10 years (excluding SPD and AFDD 5 years). Offering all of the key products to complete an installation.

FEATURES AND BENEFITS

Enclosures

MANUFACTURED FROM CORROSION AND FIRE RESISTANT MATERIAL

Corrosion and fire resistant material, which ensures full compliance with latest legislation.

MULTIPLE EXTRA LARGE KNOCK OUTS

Aides and eases installation.

CURVED STYLISH DESIGN

Blends into the environment.

TOP HINGED DOOR

Prevents door being left open after use leading to a possible fire risk. Earth continuity provided through hinge mechanism no additional cable required.

CONTINUAL EARTHING

Only need to earth once via the base.

WHITE COLOUR

Modernised aesthetics for visible installations.

CONSUMER UNIT SELECTION GUIDE

- STEP 1** Determine the type of consumer unit configuration required. e.g split load, standard or combination of split load / single RCD or dual RCD. For each switch disconnector or RCD to be used allow 2 modular ways.
- STEP 2** Determine the number of outgoing circuits required. e.g cooker, lighting, ring main etc. For each circuit to be protected by an MCB or RCBO allow 1 modular way.
- STEP 3** Determine the number of 'spare' modular ways required for future upgrades. For each 'spare' modular way select 1 sentry blank module – H5545S (cover mounted blanks supplied with consumer units).
- STEP 4** Now add together the total number of modular ways required.
- STEP 5** Select from our range of metal surface, recessed or stacked consumer units (using standard consumer units plus stacking kits). Choose the type and size most appropriate for your requirements.

FEATURES AND BENEFITS

BACKED OUT AND CAPTIVE COMBI-HEAD SCREWS

Allows simple and speedy installation.

EASILY REMOVABLE DIN RAIL

Simplifying and easing first fix.

SUPPORTING DIN RAIL "T" BAR

Additional support to prevent bowing and twisting which has been raised for improved cable routing.

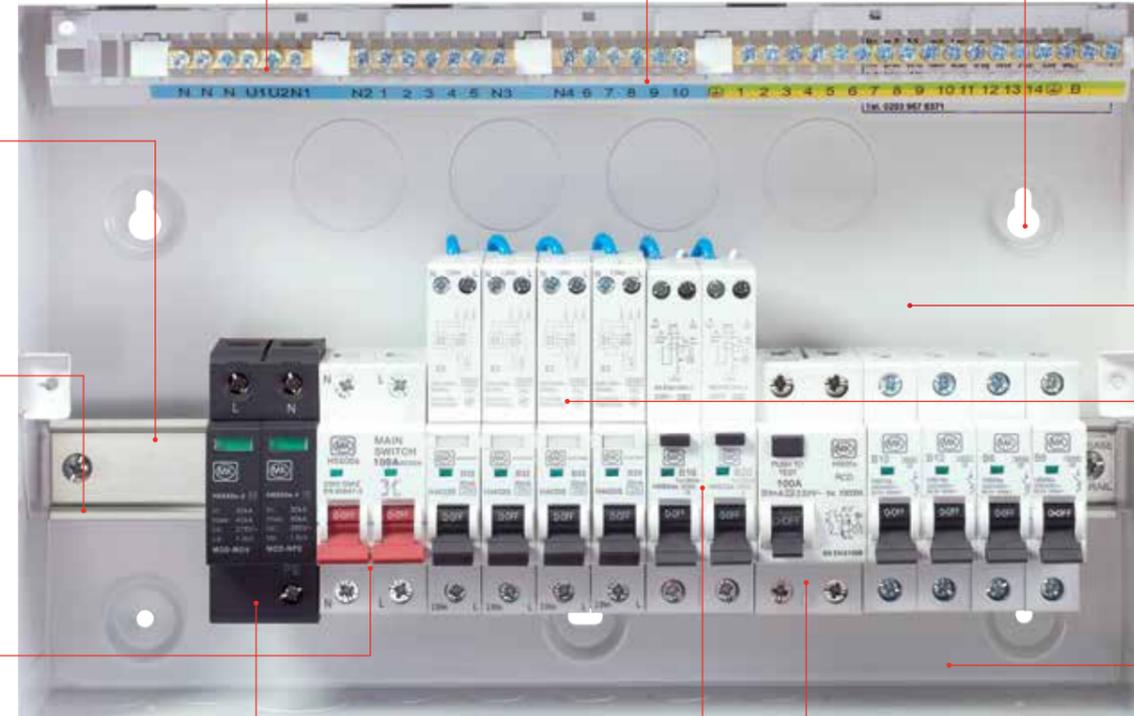

OFFSET INCOMER

Provides additional wiring space making mains input connections easier.

COLOUR CODED EARTH AND NEUTRAL TERMINAL

At top of unit for ease of wiring.

FIXING HOLES

Tripod fixing to cope with uneven surfaces.

ADDITIONAL WIRING SPACE

240mm height for increased wiring space.

ARC FAULT DETECTION DEVICE (AFDD)

Provides additional protection against accidental fire in the home.

FLOATING BUSBAR SYSTEM

Gives maximum installation flexibility.

SURGE PROTECTION DEVICE (SPD)

Protects against voltage spikes e.g. lightning strikes.

RCBO

Protects electrical equipment from residual current and over current.

TYPE AC RCD

Detects AC fault currents only. Applicable to loads without electronic components such as immersion heaters, electronic showers, oven/hobs with resistive heating elements.

TYPE A RCD

Detects AC fault currents and pulsating DC components. Applicable for single phase invertors, induction hobs, IT equipment, lighting (dimmer and LED drivers) and EV charging.
