

MK SENTRY

Surge Protection Device (SPD)

Description

MK Sentry surge device has been designed to meet the requirements of the current edition of the IET Wiring Regulations.

The device will provide protection from two forms of surge:

LEMP – Lighting Electro Magnetic Pulse

SEMP – Switching Electro Magnetic Pulse

The type 2 surge protection device is the main protection system for all low voltage electrical installations. It will prevent the spread of overvoltage in electrical installation and protects the load.

It must be provided where over voltage could-

- Cause serious injury/loss of life
- Cause interruption of public services
- Cause interruption to commercial/industry activity
- Affect a large number of co-located individuals

Standards and approvals

MK Sentry surge devices are designed to fully comply with the requirements of BS EN61643 and IEC 61643-11.

The surge devices feature positive contact status indication in accordance with In accordance with the current edition of the IET Wiring Regulations.
